Hi Maria,

I am not able to attend now as I have clients in town. What am I able to do here to ensure the committee heed our reservations on this.

Most pressing for me (and others on the street) is daft we have already been here and made representations on the matter. It seems changing owner and name of the premise circumvents the need to comply with original ruling.

This is tantamount to abuse of the system and converges on harassment. Clear representation has been made on the impact of crime, noise pollution, litter to name a few.

Only last week I asked someone just before 10 who was sitting in their car with loud music on eating a takeaway if they could turn their engine and more importantly their music as my young son (14 months was sleeping).

Thanks, Ru
