10. RESPONSE TO THE LONDON HEALTH COMMISSION: CALL FOR EVIDENCE

1 - 5

In September 2013 the Mayor of London set up the independent London Health Commission to come up with innovative ways to meet London's health and healthcare needs. The Commission will report back to the Mayor with a set of ambitious recommendations in Autumn 2014. To inform this work a 'Call for Evidence' was made in December 2013 asking the public, service providers and all other interested parties a range of questions. A Tri-borough response is being developed for the deadline for written submissions on Friday 17 January 2014. A draft of the submission will be tabled at the Board meeting on 13 January 2014 for comment.

URGENCY

By reason of special circumstance, namely the deadline for written submissions on Friday 17 January 2014, the Chairman is of the opinion that this item should be considered as a matter of urgency in accordance with s.100B(4) of the Local Government Act 1972.

1. INTRODUCTION

- 1.1 In September 2013 the Mayor of London set up the independent London Health Commission to come up with innovative ways to meet London's health and healthcare needs. Lord Ara Darzi is chairing the Commission, which has four specific themes:
- Improving the quality and integration of care
 - Enabling high quality and integrated care delivery
 - Healthy lives and reducing inequalities
 - Health economy, research and education
- 1.2 The Commission will report back to the Mayor with a set of ambitious recommendations in Autumn 2014. To inform this work a 'Call for Evidence' (Appendix 1) was made in December 2013 asking the public, service providers and all other interested parties a range of questions.
- 1.3 A Tri-borough response is being developed for the deadline for written submissions on Friday 17 January 2014. A draft of the submission will be tabled at the Board meeting on 13 January 2014 for comment.

1.4 Further information on the London Health Commission can be found at www.london.gov.uk/london-health-commission.

2. RECOMMENDATION

2.1 The Board will be asked to comment on the draft Tri-borough submission tabled at the meeting.

11 December 2013

Dear colleagues

In September the Mayor of London set up the independent London Health Commission to come up with innovative ways to meet London's health and healthcare needs.

I am chairing the Commission, which has already started a bold programme of work to look at four specific themes. These are:

- Improving the quality and integration of care
- Enabling high quality and integrated care delivery
- Healthy lives and reducing inequalities
- Health economy, research and education

The Commission will report back to the Mayor with a set of ambitious recommendations next autumn. To inform this work, we are asking the public, service providers and all other interested parties a range of questions as part of a 'Call for Evidence'.

I would be delighted if you would contribute to this process and would encourage you to visit our website www.london.gov.uk/london-health-commission, where you can find a full set of questions and details on how to respond. You can answer some or all of the questions and can send information, ideas and suggestions via email, twitter, a freepost address or through an online questionnaire.

The deadline for written submissions is on Friday 17 January 2014. Public hearing sessions will then take place in January, where some contributors will be invited to discuss their experiences and ideas before a panel.

I look forward to your valuable contribution. If you have any queries, please email healthcommission@london.gov.uk or call 020 7932 9073.

Yours sincerely

Professor the Lord Darzi of Denham PC KBE FRS FmedSci HonFREng
Chairman

Call for Evidence Questions

10 December 2013

Improving the quality and integration of care

- What has been successful in improving the quality of London's healthcare?
- What are the main challenges to improving the quality of London's healthcare?
- What are London's most important future health and care needs?
- How can we accelerate existing approaches that support high quality and more integrated care?
- What new approaches to high quality and integrated care do we need to consider?
- What can London learn from other cities globally about improving the quality of healthcare?

Enabling high quality and integrated care delivery

- What are the barriers in the healthcare system to providing high quality care?
- What are the barriers in the healthcare system to providing more integrated care?
- How can enabling factors (such as workforce, technology, information, financing, estates and commissioning) support the delivery of better quality of care?
- How can enabling factors (such as workforce, technology, information, financing, estates and commissioning) support the delivery of more integrated care?
- How can new technology help improve health at scale?
- Does London get the right share of funding to support the health sector?
- What can we learn from other cities globally about enabling the delivery of high quality and integrated care?

Healthy lives and reducing inequalities

- How can we empower individuals and use community assets to enable them to improve their own health?

- How can we better empower and support individuals and communities to put them in control of their own health care?
- How can health services work better to improve health and reduce health inequalities?
- What public health system approaches are needed to address the most complex problems (e.g. sexual health and obesity)?
- How can we ensure that other public services (such as transport, housing, education and planning) provide the maximum benefit to the Londoners' health and reduce chronic disease challenges (e.g. mental health and tuberculosis)?
- How can we encourage business, employers and the voluntary sector to provide the maximum benefit to Londoners' health?
- What resources are needed to address future challenges in improving health and reducing inequalities in the most cost-effective way?
- What are the strengths of London's public health system and what can we learn from other cities globally about improving the population's health, reducing health inequalities and maximising system working?

Health economy, research and education

- How can London's health sector (including industry, services, research, education and training) best support economic growth?
- How can health research best support London's future needs?
- How can health education and training best support London's future needs?
- How can the Academic Health Sciences Centres and Academic Health Sciences Networks better support London's health and economic goals?
- What can London learn from other cities globally about increasing the contribution of the health sector towards economic growth?

To make a submission can do so by emailing healthcommission@london.gov.uk or writing to:
