#### **QUESTION NO. 4 – 5G MOBILE PHONE MASTS**

**From:** Kate Jakobsson, Resident

**To:** Councillor Ben Coleman, Cabinet Member for Health and Adult Social Care

---

Question:

“The Minister for Digital has tried to dissuade local authorities from refusing mobile phone masts etc on health grounds. However the official ICNIRP guidelines are very limited, out of date and carry a heavy disclaimer. The weight of independent research shows that 5G and related technology is likely to cause serious health problems, causing a strain on our health services.

What will Hammersmith and Fulham Council do to stand up to the government and protect everyone’s health?”
