

London Borough of Hammersmith & Fulham

Report to: Cabinet Member for the Economy

Date: 04/06/2021

Subject: Approval of two Procurement Strategies relating to the Mund Street Redevelopment

Report of: Matt Rumble, Assistant Director for Direct Delivery

Report author: Oliver Barker, Development Manager

Summary

This report seeks the approval of two procurement strategies relating to the redevelopment of land at Mund Street. The procurement of a Design Team and the procurement of a Control Team to enable the redevelopment of the land for the delivery of new homes including genuinely affordable housing.

The first procurement strategy is for the appointment of a multi-disciplinary design team to include a lead architect and other design related services such as principle designer, civil and structural engineers, M&E engineers, planning advisers, consultation and energy advisers; to be procured from RIBA design stage 1 through to stage 3 (planning), as more particularly described in Appendix 1 of this report.

The second procurement strategy is for the appointment of a multi-disciplinary 'control team' of project management, cost consultancy, employer's agent and CDM services. The appointed contractor will be procured from RIBA stage 1 through to Stage 7 (completion of construction), as more particularly described in Appendix 2 of this report.

Recommendations

1. To approve the procurement strategy for the appointment of a multi-disciplinary design team to include a lead architect and other design related services such as principle designer, civil and structural engineers, M&E engineers, planning advisers, consultation and energy advisers as set out in Appendix 1, for the estimated total value of £1.85m for the maximum contract term to allow for the completion of RIBA stage 1, to RIBA stage 3, including some elements of RIBA 4 relating to procurement of construction contractor, with a break clause included in the Contract.
2. To approve the procurement strategy for the appointment of a multi-disciplinary 'control team' to include project management, cost consultancy, employer's agent and CDM services, as set out in Appendix 2, for the estimated total value of £1.3m for the maximum contract term of "to allow for the completion of RIBA stage 1, up to RIBA stage 7, with a break clause included in the contract.

Wards Affected: North End

H&F Priorities

Our Priorities	Summary of how this report aligns to the H&F Priorities
Building shared prosperity	<i>The redevelopment will help deliver much needed genuinely affordable homes in the borough and help rejuvenate the area.</i>
Doing things with local residents, not to them	<i>Residents will be engaged early in the development of concept design to ensure their views are considered and influence the design.</i>
Being ruthlessly financially efficient	<i>The aim is to redevelop the land using innovative designs that offer both financial savings and high-quality housing.</i>
Taking pride in H&F	<i>The redevelopment will help rejuvenate the area following site clearance and incorporate amenities and thought through landscaping.</i>

Financial Impact

There is no direct financial impact of approving these strategies as the procurement will be carried out by the existing project team. The full cost of designing the scheme and submitting the planning application will not be known until the tender process is complete. Full financial implications and checks on the financial standing of the successful tenderer will be set out in the subsequent contract award decision report.

On 7th July 2020 Cabinet approved an overall budget of £3,234,123 to progress the project up to Stage 2 (Planning) and 3 (Procurement) of the Council's Development Gateway process¹. Further financial implications of the proposed development and its feasibility are addressed in that report.

The estimated maximum total combined cost of these contracts is £3.15m so can be accommodated within the approved budget. The rest of the budget will be needed to cover capitalised officer time over the duration of the contracts.

Legal Implications

This report relates to the appointment of the design team and control team in relation to the Mund Street redevelopment project. The total value of each of the contracts to be let is above the threshold specified in the Public Contracts Regulations 2015 (as

¹ Report to Cabinet on 6 July 2020: "Investment in Affordable Housing and Appropriation of Sites"

amended) (the “PCR”) for services contracts, which is currently £189,330, and must therefore be procured in accordance with the PCR. In addition this means either a new procurement competition or the use of a framework agreement. The Contract is classified as a high value contract under the Council’s Contract Standing Orders as it is above the EU threshold for services. All high value contracts are required to:

- have a Service Review Team established to oversee the procurement (CSO 17);
- have a Procurement Strategy reviewed by the Contracts Assurance Board and approved by the relevant decision maker before the procurement process commences (CSO 18);
- have a Tender Appraisal Panel established following approval of the procurement strategy (CSO 19.3)

Further CSO 19 requires the use of either an existing framework agreement or a contract notice to be published in the Official Journal of the European Union (‘OJEU’) along with an opportunity listing on the Council’s e-tendering portal (capitalEsourcing) and publication of a contract notice on Contracts Finder.

The Procurement Strategy for both teams proposes the use of the Notting Hill Genesis Framework (CF1 and 2 for the Design Team and CF3 for the Control Team) (the “Frameworks”). The Framework Owner has confirmed that the framework was procured in accordance with the EU public procurement rules and the Council falls within the category of permitted users. The Council is therefore permitted to access these Frameworks.

The Council will need to sign up to an Access Agreement in order to use the Framework, which confirms that Notting Hill Genesis (the Framework Host) will not be held liable for use of any procurement issues which arise from the use of the Framework. The Access Agreement is a standard document and not available for negotiation however entering into it is a prerequisite for the procurement so is in the overall interest of the Council.

In order to ensure value for money is secured Officers are proposing to conduct a mini competition among the framework suppliers. It is important that value for money is considered and evidenced through the procurement process.

The decision maker should be aware that this procurement is being run alongside similar procurements in relation to Farm Lane all using the same framework within the same timescales. Officers are advised to stagger the procurements if time permits to ensure the framework providers have sufficient time to prepare well considered responses.

The framework has internal rules about how to conduct a procurement using the framework and officers will have to follow these rules. In particular, the evaluation criteria shall be as set out in the framework with percentage weightings for quality within the range 0-90% and price must range between 10%-100%, therefore the proposal within Appendix 1 is within the stated remit. In addition, the Quality criteria allows for the Consultant’s social value proposals to be assessed as part of the mini-competition and therefore the Council’s Social Value Policy may form part of the mini-competition documents.

It should be noted that the framework requires the use of its own portal for procurements. This means for the purposes of this procurement Capital E-Sourcing will not be used.

1.	Development Board Report – Gateway 0	25 th February 2020
2.	Cabinet Report – Gateway 1	7 th July 2020

DETAILED ANALYSIS

Proposals and Analysis of Options

1. This site is the former Gibbs Green School. It is owned by the Council, and is temporarily being used by Fulham Boys School, while their new premises are being constructed. They are due to remain on site until September 2020. The School is then expected to be used during the redevelopment of Avonmore Primary School.
2. The subject site is located on Mund Street in North End Ward and has been investigated to regenerate this land led site/asset and bring the under-utilised asset back into productivity.
3. This subject site is owned, maintained and managed by LBHF and after recently being reacquired by LBHF, in December 2019, has been identified, in collaboration with the Asset Strategy team, and other colleagues, as having

regeneration and development potential for the provision of new affordable housing.

4. The site was recommended for approval by Cabinet on 7th July 2020 to progress development proposals which would facilitate the delivery of 100 new homes.
5. The procurement of services outlined in Appendices 1 and 2 are needed to fulfil council's commitment to redevelop the site for replacement housing, as quickly and efficiently as possible.

The Design Team Procurement Strategy

6. The Design Team services to be procured under Appendix 1 will include a lead architect and principal designer supported by a professional team to provide outline design to RIBA 1 stage with the option to extend the award through to RIBA 3 (to planning) ("Design Team Procurement Strategy") including some elements of RIBA 4 relating to procurement of construction contractor. This will be subject to on-going project viability, council's development board's approval and further budgetary approval by cabinet.
7. The Design Team Procurement Strategy (Appendix 1) will enable the procurement and award of a call-off contract for a design team from RIBA 1 to RIBA 3. Services will be procured using the Notting Hill Genesis Framework and the call-off contract will reserve the right to terminate or re-tender at the end of each design stage, subject to confirmation of budget and viability of the development scheme.
8. The initial estimate for costs for the services of the Design Team up to the end of RIBA 4 stage (Appendix 1) is estimated at £1.85m including stage costs of Principal Designer; Architect/Lead Designer; Engagement Strategy Consultant; Structural Engineer; Services Engineer; and, Landscape Architect.

The Control Team Procurement Strategy

9. The Control Team services to be procured under Appendix 2 will include a lead consultant, Employer's Agent, project management services, CDM services and specialist cost consultancy advice, as well as other ancillary services for the redevelopment project (Control Team Procurement Strategy); to be procured using the Notting Hill Genesis Framework and the call-off contract will reserve the right to terminate or re-tender at the end of each design stage, subject to the viability of the development scheme.
10. These services will be procured from RIBA stage 1 through to RIBA stage 7. Again, with the council reserving the right to terminate the contract or re-tender at the end of each stage and subject to confirmation of budget and

viability of the development scheme. The initial instruction under the contract will be to RIBA stage 4.

11. The initial estimate for costs for services of the Control Team from RIBA 1 stage to RIBA 7 is estimated at £1.3m.

General

12. The aim of both procurement strategies is to enable timely procurement of services to enable a swift redevelopment of the land and submission of planning application in July 2021 and start on site in March 2022, subject to continued viability.

Options

13. Each Procurement Strategy for the Design Team and the Control Team (see Appendices 1 and 2) sets out the following procurement options:

- (a) Option 1 - Do nothing
- (b) Option 2 - Open market procurement exercise
- (c) Option 3 - Use of existing third-party framework

14. On review of these options, each Procurement Strategy recommends the use of a third-party framework for both the Design and Control Teams (Appendix 1) as the preferred option.

Reasons for Decision

15. The reasons for choosing the Framework are detailed in section 3 of each procurement strategy. The use of the recommended Framework will enable the council to fulfil its commitments to redevelop the site as quickly and efficiently as possible and in compliance with the requirements contained in the Council's Contract Standing Orders (CSO) to seek approval for Procurement Strategies.

Equality Implications

16. It is not expected that services to be procured under each strategy and the decision to use an existing Framework will have any direct implications on any group with protected characteristics, under the terms of the Equality Act 2010.

Implications verified by: Fawad Bhatti, Policy & Strategy Officer, tel. 07500 103617

Risk Management Implications

17. The proposals are consistent with the council's priority, Being Ruthlessly Financially Efficient, as need has clearly been established and a suitably compliant framework (in case of both appendices) has been identified; which will help ensure procurement of contracts to deliver the best service at the best price.

18. Principal risks to the procurement and mitigations are articulated in section 4 of the Mund Street Design Team Procurement Strategy and at section 4 of the Mund Street Control Team Procurement Strategy.

19. Prior to an award the project team will liaise with the council's insurance team to ensure that the appropriate levels of indemnities and insurances are agreed and in place.

Risk Implications verified by Michael Sloniowski, Risk Manager, 020 8753 2587
