Subject: RE: Fulham Cabin: Review of Public Safety Licensing Objectives

Dear Shaafiek Christian

Thanks for your email and we have noted the contents and the requirements.

Just to let you know that the premises is trading for over 25 years and all safety measures are in place but for your assurance and the safety of all concerned we have instructed for a Fire Risk assessment to be carried out. We will be able to provide that earliest by next week.(22nd December). The risk assessment will include required measures indicated.

There is a staff training Manual in place. We are being informed that as the shop is on the ground floor there is a disable excess .

There is provision for Ventilation and all Covid-19 risks are followed with the new government rules.

Kind Regards

Mr S.Panchal

Subject: Fulham Cabin: Review of Public Safety Licensing Objectives

Dear Manpreet,

I write in reference to the premises licensing application submitted for Fulham Cabin Convenience Store, 51 Fulham Broadway, SW6 1AE and received on 24 November 2021.

I am the member of the Health and Safety team, allocated to review the steps you intend to take to promote the Public Safety Licensing Objective.

Upon review of the licensing application, it is noted that the following measures will be in place: 1. Installation of appropriate safety equipment 2. Fire exit signs displayed 3. To comply with all current, fire, health and safety laws 4. CCTV working at all times.

It would be much appreciated if you could provide me with the following key information which will aid the review process:

- 1) As your premises will be situated beneath residential accommodation, I would like to make sure this arrangement is safe and that you have all necessary measures in place to prevent fire and evacuate people safely if fire does occur. Please provide a copy of your Fire Risk Assessment.
- 2) Disabled access and evacuation – what is your policy regarding admittance for disabled customers? How are you going to assure their safety at the premises?
- 3) Checks on equipment at specified intervals, e.g. gas safety checks and Portable Appliance Testing.
- 4) Standards to be maintained, e.g. Fixed electrical installations to comply with British Standards;
- 5) The provision of air conditioning and ventilation for general welfare and Covid-19 management;
- 6) Measures to protect against overcrowding;
- 7) Training for staff.

In the in the meantime I would refer you to our licensing policy, available on our website under this link [Statement of Licensing Policy 2017 - 2022.doc \(lbhf.gov.uk\)](#), especially pages 17-18, 26-27 and 30 which are relevant to public safety. Please familiarise yourself with it and elaborate on the specific measures which you are going to take to meet this objective. Please provide me with a response by **Friday, 17 December 2021.**

Thank you in advance of your co-operation.

Sincerely

Shaafiek Christian
