Having spoken to the neighbours on numerous occasions, we are now undertaking full soundproofing of the connecting walls that should prevent and additional sounds to these neighbours.

The sound of the live music is kept to the same sound of the recording music which can be played upto 12am, which hasn't caused concern upto now and with the additional soundproofing we feel that all parties will be better off.

We only have an open Mike once a week and this soundproofing would be of benefit for our full 7 days trading and for our Temporary events which can on occasion go until after midnight.

I am more than happy to discuss this with any concerned party so we can improve/eradicate any perceived issues

Thanks
Nigel Duncan

I have also contacted the direct neighbour and we are both in agreement that the soundproofing would be great for both of us and will resolve the issues.
