

London Borough of Hammersmith and Fulham

Report to: Full Council

Date: 26/02/2025

Subject: Treasury Management Strategy Statement 2025/26

Report of: Cabinet Member for Finance and Reform, Councillor Rowan Ree

Report author: Sophie Green, Treasury Manager

Responsible Director: Sukvinder Kalsi, Executive Director of Finance & Corporate Services

SUMMARY

This report sets out the Council's proposed Treasury Management Strategy Statement and Annual Investment Strategy for 2025/26 and seeks authority for the Strategic Director of Finance to deliver the treasury management activities as set out in the report.

The report is also designed to demonstrate compliance with the Local Government Act 2003, other regulations and statutory guidance for ensuring that the Council's borrowing and investment plans are prudent, affordable and sustainable, and comply with statutory requirements.

RECOMMENDATIONS

It is recommended that:

1. Approval be given to the future borrowing and investment strategies as outlined in this report.
 2. The Strategic Director of Finance, in consultation with the Cabinet Member for Finance and Reform, be delegated authority to manage the Council's cash flow, borrowing and investments in 2025/26 in line with this report.
 3. In relation to the Council's overall borrowing for the financial year, to approve the Prudential Indicators as set out in this report and the revised Annual Investment Strategy set out in Appendix E.
-

Wards Affected: All

Our Values	Summary of how this report aligns to the H&F Values
<ul style="list-style-type: none"> Building shared prosperity 	Achieve best value for money in investment and borrowing decisions.
<ul style="list-style-type: none"> Being ruthlessly financially efficient 	Effective management of the Council's cashflow resources.

Financial Impact

This report is wholly of a financial nature.

Phil Triggs, Director of Treasury and Pensions

Verified by Sukvinder Kalsi, Executive Director of Finance and Corporate Services, 6 January 2025

Legal Implications

The Local Government Act 2003 and the regulations made under that Act require the Council to:

- set out an annual statement of its treasury management strategy for borrowing, having regard to the Prudential Code and setting out the Prudential Indicators for the next three years to ensure that the Council's capital investment plans are affordable, prudent and sustainable.
- prepare an Annual Investment Strategy, setting out the Council's policies for managing its investments and for giving priority to the security and liquidity of those investments.

The Treasury Management Strategy Statement and Annual Investment Strategy must both have regard to guidance issued by the Ministry for Housing, Communities, and Local Government (MHCLG) and must be approved by the Full Council.

All other legal implications are contained within the body of the report.

Verified by Jade Monroe, Chief Solicitor, 7 January 2025

DETAILED ANALYSIS

BACKGROUND

1. The Council is required to set a balanced budget, which means that resources available during the year are budgeted for to meet expenditure. Part of the treasury management operation is to ensure that:
 - The Council's capital programme and corporate investment plans are adequately funded.
 - Cash flow is adequately planned, with cash being available when needed to discharge the Council's legal obligations and to deliver Council services.
 - Surplus monies are invested wisely in counterparties or financial instruments commensurate with the Council's low risk appetite, providing security of capital and adequate liquidity before considering investment yield.
2. Treasury management strategies provide a guide to the borrowing needs of the Council, essentially long-term cash flow planning, to ensure that the Council can meet its capital spending obligations. The management of long-term cash may involve arranging long or short-term loans, using cash flow surpluses, or restructuring any debts previously transacted to meet Council risk or cost objectives.
3. The Council has formally adopted CIPFA's Code of Practice on Treasury Management (the Code). The Code and Cross Sectoral Guidance Notes issued in 2021 require that each local authority has a Treasury Management Policy Statement that is approved by the Full Council, and this is set out in Appendix A.
4. The Council also follows other key requirements of the Code as set out in Appendix B. Prospects for interest rate changes and investment returns have been considered in developing and updating the Council's Treasury Management Strategies. The Bank of England published its latest Monetary Policy report in November 2024. CPI inflation fell to 1.70% in September but is expected to increase to around 2.50% by the end of the year.
5. The Bank of England made a majority decision on 7 November 2024 to reduce Bank Rate by 0.25% to 4.75%. The Council's treasury management advisors, Link Asset Services, are currently forecasting a further reduction to 4.50% in March 2025 followed by 4.00% in June 2025.

6. The importance of external economic factors is also a key driver in external parties setting rates and also the availability of instruments in which to invest and borrow. Appendix D sets out the present views of our treasury consultant, Link Asset Services.

7. The remainder of this report comprises the Council's Treasury Management Strategy Statement which covers three main areas as summarised below:
Borrowing

- Overall borrowing strategy
- Limits on external borrowing
- Maturity structure of borrowing
- Capital Financing Requirement (CFR) projections
- Affordability
- Minimum Revenue Provision (MRP) policy
- Borrowing in advance of need
- Debt rescheduling

Capital spending plans

- Capital spending plans
- Housing Revenue Account borrowing needs
- Other investment opportunities

Managing cash balances and investments

- Current cash position
- Cash flow forecast
- Prospects for investment returns
- Council policy on investing and managing risk
- Balancing short and long-term investments
- Annual Investment Strategy

8. The report summarises the key Prudential Indicators. These provide a reference point or "dashboard" so that senior officers and members can easily identify whether approved treasury management policies are being applied correctly in practice and take corrective action as required.

9. The Annual Investment Strategy in Appendix E provides more detail on how the Council's surplus cash investments are to be managed in 2025/26 including approved schedules of specified and non-specified investments.

10. These elements cover the requirements of the Local Government Act 2003, the CIPFA Prudential Code, the CIPFA Treasury Management Code and MHCLG Investment Guidance.

BORROWING

Overall borrowing strategy

11. The Council's main objective when borrowing money is to strike an appropriate balance between securing low interest costs and achieving cost certainty over the period for which funds are required.
12. Given the significant historic cuts to public expenditure and local government funding, the Council's borrowing strategy continues to address the key issue of affordability without compromising the long-term stability of the debt portfolio. The key factors influencing the 2025/26 strategy are:
 - forecast capital funding;
 - the current economic and market environment; and
 - interest rate forecasts.
13. The Council is currently maintaining an under-borrowed position. This means that capital expenditure has not been fully funded from loan debt as other funding streams (such as government grants and third-party contributions, use of Council reserves and cash balances and capital receipts) have been employed where available.
14. However, officers are constantly reviewing the situation to see if this remains the appropriate solution, or whether the Council should undertake more long-term borrowing to match the anticipated Capital Financing Requirement (CFR) over the coming years. Given that the Council's resources available for internal borrowing are expected to reduce as capital spending intensifies, the Council needs to maintain flexibility to borrow at opportune moments in line with the approved Prudential Indicators.
15. All new Public Works Loan Board (PWLB) loans are subject to relevant gilt yields +0.80% (certainty rate) in the General Fund, and gilt yields +0.40% for the Housing Revenue Account (HRA).

Alternatives to PWLB

16. The Council's treasury management strategy permits borrowing from various sources, but it has not been previously anticipated that any alternatives to PWLB would need to be utilised for any substantial borrowing, given the current low cost of PWLB funding.
17. In addition to the low interest rate payable, the key advantage of PWLB is the speed and ease of transaction processing and the low fee and administration cost associated with the loans. Alternative types of funding could result in lengthy due diligence, consultancy costs, legal advice and fees, and will be far more costly administratively.

Range of options

18. Alternative options for funding to PWLB include:

- Banks
- Pension fund institutional investors
- Bond issuance
- The Municipal Bonds Agency

Banks

19. Discussions with the Council's treasury consultant suggest that the Council could access borrowing from banks. However, current PWLB certainty rate pricing has resulted in banks being placed in an overly competitive environment.

Pension fund institutional investors

20. Initial indications have suggested that the Council may be able to borrow from institutional investors at rates of around gilt yield plus 1.00% for periods of over 30 to 40 years, via a private placement agreement (PPA). Such an arrangement will be subject to extensive negotiations with the lenders, who will need to carry out due diligence on a Council's finances, budgets and balance sheet.

Bond investors

21. A bond issuance would first require the Council to become credit rated by one (or more) of the major ratings agencies: Fitch, S&P or Moody's. This is a complex, lengthy, repetitive and costly process.

22. The precise rate offered will be market led and dependent on the market's perception of the financial resilience of the authority and its creditworthiness.

23. Councils with significant reserves and a record of not overspending on budget will be able to secure the most advantageous rates. Bond releases typically require a minimum size of at least £200m.

Municipal Bonds Agency

24. This has been in existence since 2013 but has only recently in 2020 transacted its first bond issuance and local authority borrower, at a rate of 1.73%.

Community Municipal Bonds

25. The treasury management strategy will also allow the use of community municipal investments, a bond like instrument, where funds can be raised from multiple investor sources, including individuals.

Future Prospects

26. Alternative opportunities for the Council may well present themselves, and the borrowing strategy will be designed to allow for this. The 'benchmark' for a borrowing opportunity is regarded at around gilts +0.8%. It is unclear at this stage whether feasible PWLB competition will materialise, and it is likely to take some time to do so.
27. Officers will continue to explore alternatives to the PWLB, working with the Council's treasury advisor, Link Asset Services. PWLB rates will also be kept under regular and active review.

Investing Primarily for Yield

28. Under the new Public Work Loans Board (PWLB) framework, the Council will need to submit its three-year capital plan to the PWLB and classify under different areas of spend, listed below, with classification the responsibility of the S151 officer. Any monies lent by the PWLB would also need to be classified under the following areas of spend:
 - Service spending
 - Housing
 - Regeneration
 - Preventative action
 - Treasury Management: refinancing and externalisation of internal borrowing
29. Under the PWLB criteria, it is stipulated: "Local authorities must not pursue a deliberate strategy of using private borrowing or internal borrowing to support investment in an asset that the PWLB would not support and then refinancing or externalising this with a PWLB loan."
30. On transacting a PWLB loan, the S151 officer is required to confirm that the local authority is not borrowing in advance of need and does not intend to buy investment assets primarily for yield. When applying for a new PWLB loan, the Council will be asked to confirm that the latest plans submitted remain current and provide assurance it does not intend to buy investment assets primarily for yield.
31. The PWLB guidance defines investment assets bought primarily for yield as:
 - buying land or existing buildings to let out at market rate;
 - buying land or buildings which were previously operated on a commercial basis which is then continued by the local authority without any additional investment or modification;
 - buying land or existing buildings, other than housing, which generate income and are intended to be held indefinitely, rather than until the achievement of some meaningful trigger, such as the completion of land assembly;

- buying a speculative investment asset (including both financial and non-financial assets) that generates yield without a direct policy purpose.

Limits on external borrowing

32. The Prudential Code requires the Council to set two limits on its total external debt, as set out in Table 1 below. The limits for 2025/26 have remained at the same level compared with the 2024/25 Treasury Management Strategy Statement (TMSS) to reflect slippage in the capital programme from previous years. The limits are:

- **Authorised Limit for External Debt (Prudential Indicator 5a):** This is the limit prescribed by section 3(1) of the Local Government Act 2003, representing the maximum level of borrowing which the Council may incur. It reflects the level of external debt which, while not desired, could be afforded in the short term, but may not be sustainable in the longer term.
- **Operational Boundary (Prudential Indicator 5b):** This is the limit which external debt is not normally expected to exceed. The boundary is based on current debt plus anticipated net financing need for future years.

Table 1: Overall borrowing limits

	2024/25	2025/26	2026/27	2027/28
	Approved	Estimate	Estimate	Estimate
	£m	£m	£m	£m
Authorised Limit for External:				
Borrowing and other long-term liabilities	790	940	960	1,010
Operational Boundary for:				
Borrowing	730	860	900	950
Other long-term liabilities	15	15	15	15
TOTAL	745	875	915	965

Maturity structure of borrowing

33. Managing the profile of when debt matures is essential for ensuring that the Council is not exposed to large, fixed rate sums falling due for refinancing within a short time period, and thus potentially exposing the Council to additional risk and cost. Table 2 below sets out current upper and lower limits for debt maturity which are unchanged from 2024/25.

Table 2: Debt maturity profile limits

Period	Actual Maturity at 30 Sep 2024	Actual Maturity at 30 Sep 2024
	£'m	%
0 to 1 year	11	4
1 to 2 Years	6	2
2 to 5 Years	16	6
5 to 10 Years	43	16
10 to 20 Years	13	5
20 to 30 Years	57	22
30 to 40 Years	38	14
40 to 50 Years	80	30
Total	263	100

34. The limit for debt maturity is a maximum 30% in one year. The Council is currently within these limits.

Maturity profile of long-term borrowing

35. The chart below shows that the principal repayment profile for current borrowing (as at 30 September 2024) remains within these limits.

Capital Financing Requirement (CFR)

36. The CFR measures the extent to which capital expenditure has not yet been financed from either revenue or other capital resources. Essentially, it measures the Council’s underlying borrowing need. Each year, the CFR will increase by the amounts of new capital expenditure not immediately financed.

37. Table 3a shows that the CFR will increase over the medium term.

Table 3a: Capital Financing Requirement forecast.

2023/24 Actuals £m		2024/25 Forecast £m	2025/26 Estimate £m	2026/27 Estimate £m	2027/28 Estimate £m
CFR as at 30 September					
266	General Fund Closing CFR (detail in Table 3b)	271	301	301	300
348	Closing Forecast HRA CFR (including deferred costs of disposal)	451	555	593	650
614	TOTAL	722	856	894	950
Annual Change					
113	General Fund	5	30	0	(1)
115	HRA	103	104	38	57
228	TOTAL	108	134	38	56

38. A more detailed analysis of the closing Forecast CFR is shown below:

Table 3b: General Fund Capital Financing Requirement forecast (detailed)

2023/24 Actuals £m		2024/25 Forecast £m	2025/26 Estimate £m	2026/27 Estimate £m	2027/28 Estimate £m
163	General Fund CFR excluding self-financing schemes and loans	187	225	227	228
88	Self-financing schemes and loans	72	65	63	62
14	PFI and Finance lease liabilities	12	11	11	10
265	TOTAL	271	301	301	300

39. Table 4 below confirms that the Council's gross debt does not exceed the total of the CFR in the preceding year plus the estimates of any additional CFR for current year and the following two financial years. This allows some flexibility for limited early borrowing for future years but ensures that borrowing is not undertaken for revenue purposes.

Table 4: Borrowing compared to the Capital Financing Requirement

2023/24 Actual £m		2024/25 Forecast £m	2025/26 Estimate £m	2026/27 Estimate £m	2027/28 Estimate £m
268	Gross Projected Debt	253	467	594	693
614	Capital Financing Requirement	722	856	894	950
346	Under / (over) borrowing	469	389	300	257

Affordability

40. The objective of the affordability indicators is to ensure that the level of investment in capital assets proposed remains within sustainable limits, including the impact on the Council's "bottom line" as reflected in the impact on council tax and rent levels. Table 5 below sets out the expected ratio of capital financing costs to income for both General Fund and HRA activities:

Table 5: Ratio of capital financing costs to income

2023/24 Actual %		2024/25 Forecast %	2025/26 Estimate %	2026/27 Estimate %	2027/28 Estimate %
2.85	General Fund	2.82	(0.79)	0.69	0.84
25.62	HRA	35.42	29.75	31.95	32.39

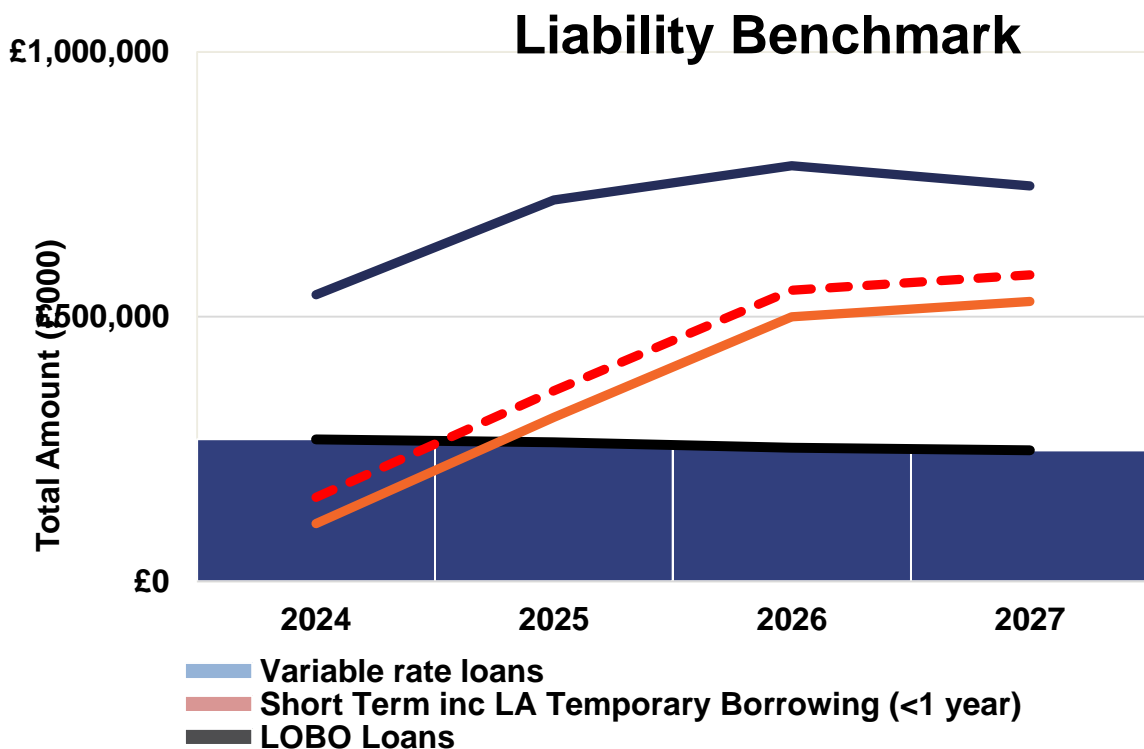

Table 6: Ratio of commercial/service investment income to net revenue stream

2023/24 Actual %		2024/25 Forecast %	2025/26 Estimate %	2026/27 Estimate %	2027/28 Estimate %
1.80	General Fund	1.80	1.31	1.33	1.34
2.71	HRA	0.07	3.04	2.99	2.91

41. From 2025/26 onwards, gross capital financing charges (loan interest, MRP and finance and PFI payments) for the General Fund capital programme will start to increase as a proportion of the income from investments and the commercial property portfolio, as new debts are raised to close the gap between funding and the CFR.
42. The capital financing charges arising from the HRA capital programme increase in line with the forecast increased income, hence capital charges as a proportion of the HRA net revenue stream will remain fairly steady.

Liability Benchmark

43. The updated prudential code requires the Council to produce a liability benchmark. The Council is required to estimate and measure the liability benchmark for the forthcoming financial year and the following two financial years, as a minimum.
44. There are four components to the Liability Benchmark:
- **Existing loan debt outstanding:** the Authority's existing loans that are still outstanding in future years.
 - **Loans CFR:** this is calculated in accordance with the loans CFR definition in the Prudential Code and projected into the future based on approved prudential borrowing and planned MRP.
 - **Net loans requirement:** this will show the Authority's gross loan debt less treasury management investments at the last financial year-end, projected into the future and based on its approved prudential borrowing, planned MRP and any other major cash flow forecast.
 - **Liability benchmark (or gross loans requirement):** this equals net loans requirement plus short-term liquidity allowance.
45. The liability benchmark uses the above information to plan the future borrowing requirements of the Council.
46. Based on the current calculations, the liability benchmark forecasts that the Council would need to borrow £97m in 2025/26, and a further £200m in 2026/27 (collective £297m requirement).

Minimum Revenue Provision (MRP) Policy

47. Capital expenditure is generally defined as expenditure on assets that have a life expectancy of more than one year. The accounting approach is to spread the cost over the estimated useful life of the asset. The mechanism for spreading these costs is through an annual MRP. The MRP is the means by which capital expenditure, which is financed by borrowing or credit arrangements, is funded by Council Tax.
48. Regulation 27 of the Local Authorities (Capital Finance and Accounting) (England) Regulations 2003, as amended (Statutory Instrument (SI) 3146/2003) requires Full Council to approve a Minimum Revenue Provision (MRP) Statement setting out the policy for making MRP and the amount of MRP to be calculated which the Council considers to be prudent. In setting a level which the Council considers to be prudent, the guidance states that the broad aim is to ensure that debt is repaid over a period reasonably commensurate with that over which the capital expenditure provides benefits to the Council.
49. The 2003 Regulations have been further amended with full effect from April 2025 to expressly provide that in determining a prudent provision local authorities cannot exclude any amount of CFR from its calculation, unless by an exception set out in statute.

Borrowing in advance of need

50. The Council has the power to borrow in advance of need in line with its future borrowing requirements under the Local Authorities (Capital Finance and Accounting) (England) Regulations 2003, as amended. Any decision to borrow in advance will be within forward approved Capital Financing Requirement estimates and will be considered carefully to ensure that value for money can be demonstrated, and that the Council can ensure the security of such funds..
51. Risks associated with any borrowing in advance of activity will be subject to prior appraisal and subsequent reporting through the mid-year or annual reporting mechanism.

Debt rescheduling

52. As short-term borrowing rates will be considerably cheaper than longer term fixed interest rates, there may be opportunities to generate savings by switching from long term debt to short term debt. However, these savings will need to be considered in light of the current treasury position and the cost of debt repayment (premiums incurred), which are very costly.
53. The reasons for any rescheduling to take place will include:
 - generating cash savings and / or discounted cash flow savings;
 - helping to fulfil the treasury strategy; and

- enhancing the balance of the portfolio by amending the maturity profile and/or the balance of volatility.
54. Consideration will also be given to identifying the potential for making savings by running down investment balances to repay debt prematurely as short-term rates on investments are likely to be lower than rates paid on current debt.
 55. Any rescheduling must be authorised by the Director of Finance in consultation with the lead Cabinet Member.

CAPITAL

Capital spending plans

56. The Prudential Code requires that any borrowing and investment decisions are taken in light of capital spending plans and consideration of how that proposed capital expenditure will be financed. The Council's capital expenditure plans have been reported in the four-year capital programme 2025/26 to 2028/29 reported elsewhere on the Committee's agenda, both in terms of those agreed previously, and those forming part of the current budget cycle.
57. Any slippage against the capital programme, or new capital approvals, will impact the figures reported throughout this report.

Housing Revenue Account (HRA) borrowing

58. Local authorities with a HRA can borrow against their expected rental income, in line with the Prudential Code.
59. For the period 2025/26 to 2028/29, based on the planned four-year capital programme and due to reduced cash balances from the latter half of 2025/26 onwards, the HRA may need to actively consider new external borrowing.
60. Where the HRA is borrowing below its level of CFR and is under borrowed, the General Fund will make an accounting charge to the HRA based on the average yield earned on the General Fund investment portfolio applied to the under borrowed position.

Other investment opportunities

61. As well as investing in assets owned by the Council and used in the delivery of services, the Council also invests, or may invest, where appropriate, in:
 - Infrastructure projects, such as green energy;
 - Loans to third parties;
 - Shareholdings in limited companies and joint ventures.
62. Such investments are treated as expenditure for treasury management and Prudential borrowing purposes, even though they do not create physical assets in the Council's accounts. Appropriate budgets in respect of these activities will

be agreed as part of the Council's budget setting and ongoing monitoring processes and considered as part of the Annual Investment Strategy.

MANAGING CASH BALANCES

Current position and cash flow forecast

63. Table 6 below shows that cash balances have decreased by £42m. The cash largely comprises the Council's usable reserves, capital receipts and unspent grants.

Table 7: Cash position at 30 September 2024

As at 31 March 2024			As at 30 September 2024		
Principal	Average Rate		Principal	Average Rate	
£m	%		£m	%	
Investments					
159	5.6	Specified	117	5.2	
0	0.0	Non-Specified	0	0.0	
159		Total	117		
Borrowing					
269	3.7	Public Works Loan Board	264	3.7	
269		Total	264		

64. The Council aims to manage daily cash flow peaks and troughs to achieve a nil current account balance daily throughout the year. As such the average yearly surplus cash balances should be fully invested throughout.

Prospects for investment returns

65. The Bank Rate was reduced from 5.00% to 4.75% at the November MPC meeting and is predicted fall further in 2025. The Council should therefore expect investment returns to drop in 2025/26.
66. Money Market Funds (MMFs) and Debt Management Account Deposit Facility (DMADF) yields have decreased since 1 April 2024 in response to Bank Rate reductions.
67. The Table in Appendix C, provided by the treasury consultant, sets out the forecasted rates.

Council policy on investing and managing risk

68. The aim is to manage risk and reduce the impact of any adverse movement in interest rates while providing sufficient flexibility to capitalise on opportunities to reduce costs or improve performance.

Balancing short- and longer-term investments

69. During the first half of 2024/25, there have been no new investments of surplus funds for more than 364 days. The 2025/26 Annual Investment Strategy permits investing for more than 364 days. Using longer term maturity investments would improve yields; however, this needs to be balanced with liquidity needs.

Table 8: Investment limits

2023/24 Actual £m	2024/25 Forecast £m	2025/26 Estimate £m	2026/27 Estimate £m	2027/28 Estimate £m
0	120	120	120	120

Annual Investment Strategy

70. The Council holds significant invested funds, representing income received in advance of expenditure, balances and reserves.
71. The Local Government Act 2003 requires the Council to prepare an Annual Investment Strategy, setting out the Council's policies for managing its investments and for ensuring the security and liquidity of those investments. This strategy is set out in Appendix E.
72. Investments are made with reference to the core balance, future cash flow requirements and the outlook for interest rates. The Council's investment priorities will always be security of capital first, liquidity second, then investment yield.

SUMMARY OF PRUDENTIAL INDICATORS

73. The purpose of prudential indicators (PIs) is to provide a reference point or "dashboard" so that senior officers and members can:
- easily identify whether approved treasury management policies are being applied correctly in practice; and
 - take corrective action as required.
74. As the Council's S151 officer, the Strategic Director of Finance has responsibility to ensure that appropriate prudential indicators are set and monitored and that any breaches are reported to members. The Strategic Director of Finance has confirmed that the PIs set out below are all expected to be complied with in 2023/24 and it is not envisaged at this stage that there will be any difficulty in achieving compliance with the suggested indicators for 2024/25.

	2024/25 indicator	2024/25 forecast	2025/26 proposed
Authorised limit for external debt	£850m	£264m	£920m
Operational debt boundary	£805m	£264m	£875m
Capital Financing Requirement (CFR)	£784m	£740m	£856m
Capital expenditure	£264m	£245m	£214m
Working capital balance	£0m	£0m	£0m
Net debt vs CFR	£317m underborrowing	£243m underborrowing	£389m underborrowing
Limit on surplus funds invested for more than 364 days (i.e. non-specified investments)	£120m	£0m	£120m
Maturity structure of borrowing	Upper limit under 12 months - 15%	Upper limit under 12 months - 2%	Upper limit under 12 months - 15%
	Lower limit 10 years and above - 100%	Lower limit 10 years and above - 76%	Lower limit 10 years and above - 100%

	2024/25 indicator	2024/25 forecast	2025/26 proposed
Ratio of financing costs to revenue stream	GF 2.82%	GF 2.82%	GF (0.79%)
	HRA 35.42%	HRA 35.42%	HRA 29.75%
Ratio of financing costs to revenue stream	GF 1.80%	GF 1.80%	GF 1.31%
	HRA 3.41%	HRA 0.07%	HRA 3.04%

Reasons for Decision

75. This report represents the Council's Treasury Management Strategy Statement for 2025/2026. It is a regulatory requirement for this report to be reported to the Council. It is recommended that approval is given to the future borrowing and investment strategies as outlined in this report.

Equality Implications

76. There are no equality implications for groups with protected characteristics (under the Equality Act 2010) as a result of this report. EIAs have been completed for each service area to which the underlying financing in this report relates to. Additionally, there is a general EIA which assesses the impacts on equality of the main items in the budget proposed to Full Council.

Risk Management Implications

77. Treasury Management contributes to all the Council values and objectives. Management of treasury risks are commensurate to the risk appetite of the Council. The effective understanding, control and management of the many aspects of risk associated with treasury management are essential to achieving and Council's objectives. Risk management is therefore embedded throughout treasury guidance, policies and practices.
78. Treasury risks present themselves in many forms. These include failure to optimise performance by not taking advantage of opportunities or managing exposure to changing economic circumstances. Most recently the situation is somewhat uncertain due to the impact of the pandemic and the subsequent high levels of inflation. In adopting a policy of managing risk, an authority is determining its level of risk acceptance.
79. The key challenge is to understand, identify, monitor and manage risks in a planned and effective way. Local authorities are required to report annually to Full Council on their treasury management strategy statement (TMSS) before the start of the year, which sets the objectives and boundaries for the approach to treasury activity.
80. The authority supplements this with treasury management practice schedules (TMPs), which set out the practical arrangement to achieve those objectives. The TMPs inform the day-to-day practices applied to manage and control treasury activities. Local authorities are typically financially risk averse and greatly value stability in order to form council tax and housing rent levels, through to general fund and HRA budgets.

Implications verified by: David Hughes, Director of Audit, Risk and Fraud, tel. 020 7361 2389, December 2024

Climate and Ecological Emergency Implications

81. The Council will not intentionally place cash investment deposits which are inconsistent with its environmental and social policy objectives. This would include avoiding direct investment in institutions where there is verifiable material links to harmful practices, such as human rights abuse or environmentally climate damaging activities.
82. The Council will consider investments that deliver environmental and social benefits, provided that security and liquidity criteria have already been met.

Local Economy and Social Value

83. The Council's borrowing and investment activity represents significant expenditure and income within the Borough and, consequently, where supplies are sourced locally, changes in borrowing or investment may impact either positively or negatively on local contractors and sub-contractors.

84. Where capital expenditure increases, or is brought forward, this may have a beneficial impact on local businesses. Conversely, where expenditure decreases, or is slipped, there may be an adverse impact on local businesses.

Implications verified by: Nicki Burgess, Economic Development Team, tel: 0208 753 5695, December 2024

Consultation

85. Consultation took place with the Council's investment advisor, Link Asset Services, in respect of the economic and interest rate update.

Appendix G: Risk Register

THE TREASURY MANAGEMENT POLICY STATEMENT

The CIPFA recommendations contained in the Code of Practice and Cross Sectoral Guidance Notes issued as a revised version in 2009, 2011 and 2018 for Treasury Management in the Public Services require that each Local Authority has a Treasury Management Policy Statement that is approved by the Full Council.

CIPFA recommends that the Council's treasury management policy statement adopts the following form of words below to define the policies and objectives of its treasury management activities.

This Council defines its Treasury Management activities as:

- The management of the Council's investments and cash flows, its banking, money market and capital market transactions; the effective control of the risks associated with those activities; and the pursuit of optimum performance consistent with those risks.
- This Council regards the successful identification, monitoring and control of risk to be the prime criteria by which the effectiveness of its treasury management activities will be measured. Accordingly, the analysis and reporting of Treasury Management activities will focus on their risk implications for the organisation, and any financial instruments entered into to manage these risks.

This Council acknowledges that effective Treasury Management will provide support towards the achievement of its business and service objectives. It is therefore committed to the principles of achieving value for money in treasury management, and to employing suitable comprehensive performance.

MEETING CIPFA REQUIREMENTS

The Council has formally adopted CIPFA's Code of Practice on Treasury Management (updated 2018) and complies with the requirements of the Code as detailed below:

- Maintaining a Treasury Management Policy Statement setting out the policies and objectives of the Council's treasury management activities
- Maintaining a statement of Treasury Management Practices that sets out the manner in which the Council will seek to achieve these policies and objectives.
- Presenting to the appropriate body an annual Treasury Management Strategy Statement, including an annual investment strategy (this report) and Minimum Revenue Provision policy for the year ahead (separate report on the agenda), a half year review report and an annual report (stewardship report) covering compliance during the previous year
- A statement of delegation for treasury management functions and for the execution and administration of treasury management decisions (see below).
- Delegation of the role of scrutiny of treasury management activities and reports to a specific named body. At the London Borough of Hammersmith & Fulham, this role is undertaken by the Audit Committee.

Treasury Management Delegations and Responsibilities

The respective roles of the Council, Cabinet, Audit Committee, and of the Section 151 officer and the Director of Treasury and Pensions are summarised below. Further details are set out in the Statement of Treasury Management Practices.

Council

Council will approve the annual treasury management strategy statement, including borrowing and investment strategies. In doing so, Council will establish and communicate its appetite for risk within treasury management having regard to the Prudential Code.

Cabinet

Cabinet will recommend to Council the annual treasury strategy, including borrowing and investment strategies and receive a half-year report and annual outturn report on treasury activities. Cabinet also approves revenue budgets, including those for treasury activities.

Audit Committee

This committee is responsible for ensuring effective scrutiny of treasury strategy and policies.

Section 151 Officer

The role of the Section 151 is vested in the Executive Director of Finance and Corporate Services post (the S151 Officer), pursuant to Section 101 of the Local Government Act 1972 and by the Executive under Section 15 of the Local Government Act 2000.

The S151 Officer may authorise officers to exercise on their behalf functions delegated to them. Any decisions taken under this authority shall remain the responsibility of the S151 Officer and must be taken within the guidelines of the Treasury Management Strategy.

The S151 Officer has full delegated powers from the Council and is responsible for the following activities:

- Investment management arrangements and strategy;
- Borrowing and debt strategy;
- Monitoring investment activity and performance;
- Overseeing administrative activities;
- Ensuring compliance with relevant laws and regulations;
- Provision of guidance to officers and members in exercising delegated powers.

Director of Treasury and Pensions

Has responsibility for the execution and administration of treasury management decisions, acting in accordance with the Council's Treasury Policy Statement and CIPFA's 'Standard of Professional Practice on Treasury Management'. The authority to implement investment management arrangements and strategy delegated to the S151 Officer extends to the Tri-Borough Director of Treasury and Pensions, and the Tri-Borough Director of Treasury and Pensions' direct reports within the limits outlined in this report.

Treasury team

Undertakes day-to-day treasury investment and borrowing activity in accordance with strategy, policy, practices and procedures.

Training

The Code requires the S151 officer to ensure that members with responsibility for making treasury management decisions and for scrutinising treasury functions receive adequate training. The training needs of all officers are reviewed periodically as part of the Learning and Development programme. Officers attend various seminars, training sessions and conferences during the year and appropriate Member training is offered as and when needs and suitable opportunities are identified.

Monitoring and Reporting

The Treasury Management activities during the year will be included in the monitoring reports to the Audit Committee.

The Council's Treasury Management Strategy will be approved annually by Full Council and there will also be a mid-year report. The aim of these reporting arrangements is to ensure that those with the responsibility for treasury management policies and activities and those implementing policies and executing transactions have properly fulfilled their responsibilities with regard to delegation and reporting.

The Council will adopt the following reporting arrangements in accordance with the requirements of the revised code:

Area of Responsibility	Council / Committee / Officer	Frequency
Treasury Management Strategy	1. Political Cabinet 2. Cabinet 3. Full Council	Annually at meeting before the start of the financial year.
Treasury Management Strategy: Mid-year report	Audit Committee	Annually after the first half of the financial year
Treasury Management Strategy: Updates / revisions at other times	Full Council	As and when required
Treasury Outturn Report	1. Political Cabinet 2. Cabinet 3. Audit Committee	Annually after year-end
Treasury Management Monitoring Reports	Executive Director of Finance and Corporate Services and Cabinet Member for Finance and Reform	Weekly/Monthly

PROSPECTS FOR INTEREST RATES

1. The Authority has appointed Link Group as its treasury advisor and part of their service is to assist the Authority to formulate a view on interest rates. Link provided the following forecasts on 11 November 2024. These are forecasts for Bank Rate, average earnings and PWLB certainty rate borrowing (gilt yields plus 80 bps).

Link Group Interest Rate View	11.11.24												
	Dec-24	Mar-25	Jun-25	Sep-25	Dec-25	Mar-26	Jun-26	Sep-26	Dec-26	Mar-27	Jun-27	Sep-27	Dec-27
BANK RATE	4.75	4.50	4.25	4.00	4.00	3.75	3.75	3.75	3.50	3.50	3.50	3.50	3.50
3 month ave earnings	4.70	4.50	4.30	4.00	4.00	4.00	3.80	3.80	3.80	3.50	3.50	3.50	3.50
6 month ave earnings	4.70	4.40	4.20	3.90	3.90	3.90	3.80	3.80	3.80	3.50	3.50	3.50	3.50
12 month ave earnings	4.70	4.40	4.20	3.90	3.90	3.90	3.80	3.80	3.80	3.50	3.50	3.50	3.50
5 yr PWLB	5.00	4.90	4.80	4.60	4.50	4.50	4.40	4.30	4.20	4.10	4.00	4.00	3.90
10 yr PWLB	5.30	5.10	5.00	4.80	4.80	4.70	4.50	4.50	4.40	4.30	4.20	4.20	4.10
25 yr PWLB	5.60	5.50	5.40	5.30	5.20	5.10	5.00	4.90	4.80	4.70	4.60	4.50	4.50
50 yr PWLB	5.40	5.30	5.20	5.10	5.00	4.90	4.80	4.70	4.60	4.50	4.40	4.30	4.30

2. Following the 30 October Budget, the outcome of the US Presidential election on 6 November, and the 25bps Bank Rate cut undertaken by the Monetary Policy Committee (MPC) on 7 November, Link have significantly revised their central forecasts for the first time since May. In summary, the Bank Rate forecast is now 50bps – 75bps higher than was previously the case, whilst PWLB forecasts have been materially lifted to not only reflect increased concerns around the future path of inflation, but also the increased level of Government borrowing over the term of the current Parliament.
3. Following the 30 October Budget, Link's central case is that those policy announcements will be inflationary, at least in the near-term. The Office for Budgetary Responsibility and the Bank of England concur with that view. The latter have the CPI measure of inflation hitting 2.5% y/y by the end of 2024 and staying sticky until at least 2026. The Bank forecasts CPI to be 2.7% y/y (Q4 2025) and 2.2% (Q4 2026) before dropping back in 2027 to 1.8% y/y.
4. The anticipated major investment in the public sector, according to the Bank, is expected to lift UK real GDP to 1.7% in 2025 before growth moderates in 2026 and 2027. The debate around whether the Government's policies lead to a material uptick in growth primarily focus on the logistics of fast-tracking planning permissions, identifying sufficient skilled labour to undertake a resurgence in building, and an increase in the employee participation rate within the economy.
5. There are inherent risks to all the above. The worst-case scenario would see systemic blockages of planning permissions and the inability to identify and resource the additional workforce required to deliver large-scale IT, housing and infrastructure projects. This would lead to upside risks to inflation, an increased prospect of further Government borrowing & tax rises, and a tepid GDP performance.
6. Link's central view is that monetary policy is sufficiently tight at present to cater for some further moderate loosening, the extent of which, however, will continue to be data dependent. Link forecast the next reduction in Bank Rate to be made in

February and for a pattern to evolve whereby rate cuts are made quarterly and in keeping with the release of the Bank's Quarterly Monetary Policy Reports (February, May, August and November).

7. Any movement below a 4% Bank Rate will, nonetheless, be very much dependent on inflation data in the second half of 2025. The fact that the November MPC rate cut decision saw a split vote of 8-1 confirms that there are already some concerns around inflation's stickiness, and with recent public sector wage increases beginning to funnel their way into headline average earnings data, the market will be looking very closely at those releases.
8. Regarding Link's PWLB forecast, the short to medium part of the curve is forecast to remain elevated over the course of the next year, and the degree to which rates moderate will be tied to the arguments for further Bank Rate loosening or otherwise. The longer part of the curve will also be impacted by inflation factors, but there is also the additional concern that with other major developed economies such as the US and France looking to run large budget deficits there could be a glut of government debt issuance that investors will only agree to digest if the interest rates paid provide sufficient reward for that scenario.
9. Donald Trump's victory in the US election paves the way for the introduction/extension of tariffs that could prove inflationary whilst the same could be said of further tax cuts and an expansion of the current US budget deficit. Invariably the direction of US Treasury yields in reaction to his core policies will, in all probability, impact UK gilt yields. So, there are domestic and international factors that could impact PWLB rates whilst, as a general comment, geo-political risks abound in Europe, the Middle East and Asia.
10. Link's revised PWLB rate forecasts below are based on the Certainty Rate (the standard rate minus 20 bps) which has been accessible to most authorities since 1 November 2012. Please note, the lower Housing Revenue Account (HRA) PWLB rate started on 15 June 2023 for those authorities with an HRA (standard rate minus 60 bps).

Gilt yields and PWLB rates

11. The overall longer-run trend is for gilt yields and PWLB rates to fall back over the timeline of Link's forecasts, but the risks to their forecasts are to the upside. Link's target borrowing rates are set **two years forward** (as they expect rates to fall back) and the current PWLB (certainty) borrowing rates are set out below: -

PWLB debt	Current borrowing rate as at 11.11.24 p.m.	Target borrowing rate now (end of Q3 2026)	Target borrowing rate previous (end of Q3 2026)
5 years	5.02%	4.30%	3.90%
10 years	5.23%	4.50%	4.10%
25 years	5.66%	4.90%	4.40%

50 years	5.42%	4.70%	4.20%
----------	-------	-------	-------

12. **Borrowing advice:** Link's long-term (beyond 10 years) forecast for Bank Rate has been increased to 3.25% (from 3%). As all PWLB certainty rates are currently significantly above this level, borrowing strategies will need to be reviewed in that context. Overall, better value can be obtained at the shorter end of the curve and short-dated fixed LA to LA monies should also be considered. Temporary borrowing rates will, generally, fall in line with Bank Rate cuts.
13. Link's suggested budgeted earnings rates for investments up to about three months' duration in each financial year are set out below.

Average earnings in each year	Now	Previously
2024/25 (residual)	4.60%	4.25%
2025/26	4.10%	3.35%
2026/27	3.70%	3.10%
2027/28	3.50%	3.25%
2028/29	3.50%	3.25%
Years 6 to 10	3.50%	3.25%
Years 10+	3.50%	3.50%

14. Link will continue to monitor economic and market developments as they unfold. Link formally review their forecasts following the quarterly release of the Bank of England's Monetary Policy Report but will also consider their position on an ad hoc basis as required.
15. Link's interest rate forecast for Bank Rate is in steps of 25 bps, whereas PWLB forecasts have been rounded to the nearest 10 bps and are central forecasts within bands of + / - 25 bps. Link continue to monitor events and will update its forecasts as and when appropriate.

ECONOMIC UPDATE

1. The third quarter of 2024 saw:
 - GDP growth stagnating in July following downwardly revised Q2 figures (0.5% q/q)
 - A further easing in wage growth as the headline 3myy rate (including bonuses) fell from 4.6% in June to 4.0% in July;
 - CPI inflation hitting its target in June before edging above it to 2.2% in July and August;
 - Core CPI inflation increasing from 3.3% in July to 3.6% in August;
 - The Bank of England initiating its easing cycle by lowering interest rates from 5.25% to 5.0% in August and holding them steady in its September meeting;
 - 10-year gilt yields falling to 4.0% in September.
2. The economy's stagnation in June and July points more to a mild slowdown in GDP growth than a sudden drop back into a recession. Moreover, the drop in September's composite activity Purchasing Managers Index, from 53.8 in August to 52.9, was still consistent with GDP growth of 0.3%-0.4% for the summer months. This is in line with the Bank of England's view, and it was encouraging that an improvement in manufacturing output growth could be detected, whilst the services PMI balance suggests non-retail services output grew by 0.5% q/q in Q3. Additionally, the services PMI future activity balance showed an uptick in September, although readings after the Chancellor's announcements at the Budget on 30th October will be more meaningful.
3. The 1.0% m/m jump in retail sales in August was stronger than the consensus forecast for a 0.4% m/m increase. The rise was reasonably broad based, with six of the seven main sub sectors recording monthly increases, though the biggest gains came from clothing stores and supermarkets, which the ONS reported was driven by the warmer-than-usual weather and end of season sales. As a result, some of that strength is probably temporary.
4. The Government's plans to raise public spending by around £16bn a year (0.6% GDP) have caused concerns that a big rise in taxes will be announced in the Budget, which could weaken GDP growth in the medium-term. However, if taxes are raised in line with spending (i.e., by £16bn) that would mean the overall stance of fiscal policy would be similar to the previous government's plan to reduce the budget deficit. Additionally, rises in public spending tend to boost GDP by more than increases in taxes reduce it.
5. The further easing in wage growth will be welcomed by the Bank of England as a sign that labour market conditions are continuing to cool. The 3myy growth rate of average earnings fell from 4.6% in June to 4.0% in July. On a three-month annualised basis, average earnings growth eased from 3.0% to 1.8%, its lowest rate since December 2023. Excluding bonuses, the 3myy rate fell from 5.4% to 5.1%.
6. Other labour market indicators also point to a further loosening in the labour market. The 59,000 fall in the alternative PAYE measure of the number of

employees in August marked the fourth fall in the past five months. And the 77,000 decline in the three months to August was the biggest drop since November 2020. Moreover, the number of workforce jobs fell by 28,000 in Q2. The downward trend in job vacancies continued too. The number of job vacancies fell from 872,000 in the three months to July to 857,000 in the three months to August. That leaves it 34% below its peak in May 2022, and just 5% above its pre-pandemic level. Nonetheless, the Bank of England is still more concerned about the inflationary influence of the labour market rather than the risk of a major slowdown in labour market activity.

7. CPI inflation stayed at 2.2% in August, but services inflation rose from a two-year low of 5.2% in July to 5.6%, significantly above its long-run average of 3.5%. Food and fuel price inflation exerted some downward pressure on CPI inflation, but these were offset by the upward effects from rising furniture/household equipment inflation, recreation/culture inflation and a surprisingly large rise in airfares inflation from -10.4% in July to +11.9% in August. As a result, core inflation crept back up from 3.3% to 3.6%. CPI inflation is also expected to rise in the coming months, potentially reaching 2.9% in November, before declining to around 2.0% by mid-2025.
8. The Bank initiated its loosening cycle in August with a 25bps rate cut, lowering rates from 5.25% to 5.0%. In its September meeting, the Bank, resembling the ECB more than the Fed, opted to hold rates steady at 5.0%, signalling a preference for a more gradual approach to rate cuts. Notably, one Monetary Policy Committee (MPC) member (Swati Dhingra) voted for a consecutive 25bps cut, while four members swung back to voting to leave rates unchanged. That meant the slim 5-4 vote in favour of a cut in August shifted to a solid 8-1 vote in favour of no change.
9. Looking ahead, CPI inflation will likely rise in the coming months before it falls back to its target of 2.0% in mid-2025. The increasing uncertainties of the Middle East may also exert an upward pressure on inflation, with oil prices rising in the aftermath of Iran's missile attack on Israel on 1 October. China's recent outpouring of new fiscal support measures in the latter stages of September has also added to the upshift in broader commodity prices, which, in turn, may impact on global inflation levels and thus monetary policy decisions. Despite these recent developments, our central forecast is still for rates to fall to 4.5% by the end of 2024 with further cuts likely throughout 2025. This is in line with market expectations, however, although a November rate cut still looks likely, December may be more problematic for the Bank if CPI inflation spikes towards 3%. In the second half of 2025, though, we think a more marked easing in inflation will prompt the Bank to speed up, resulting in rates eventually reaching 3.0%, rather than the 3.25-3.50% currently priced in by financial markets.
10. Looking at gilt movements in the first half of 2024/25, the 10-year gilt yield declined from 4.32% in May to 4.02% in August as the Bank's August rate cut signalled the start of its loosening cycle. Following the decision to hold the Bank Rate at 5.0% in September, the market response was muted, with the 10-year yield rising by only 5bps after the announcement. This likely reflected the fact that money markets had priced in a 25% chance of a rate cut prior to the meeting. The yield had already increased by about 10bps in the days leading up to the meeting, driven in part by the Fed's "hawkish cut" on 18 September. There is a possibility that gilt yields will rise near-term as UK policymakers remain cautious due to persistent inflation concerns, before declining in the longer term as rates fall to 3.0%.

11. The FTSE 100 reached a peak of 8,380 in the third quarter of 2024, but its performance is firmly in the shade of the US S&P500, which has breached the 5,700 threshold on several occasions recently. Its progress, however, may pause for the time being whilst investors wait to see who is elected the next US President, and how events in the Middle East (and Ukraine) unfold. The catalyst for any further rally (or not) is likely to be the degree of investors' faith in AI.

MPC meetings: 9 May, 20 June, 1 August, 19 September 2024

- 12. On 9 May, the Bank of England's Monetary Policy Committee (MPC) voted 7-2 to keep Bank Rate at 5.25%. This outcome was repeated on 20th June.
- 13. However, by the time of the August meeting, there was a 5-4 vote in place for rates to be cut by 25bps to 5%. However, subsequent speeches from MPC members have supported Governor Bailey's tone with its emphasis on "gradual" reductions over time.
- 14. Markets thought there may be an outside chance of a further Bank Rate reduction in September, following the 50bps cut by the FOMC, but this came to nothing.
- 15. Nonetheless, November still looks most likely to be the next month to see a rate cut to 4.75% but, thereafter, inflation and employment data releases, as well as geo-political events, are likely to be the determinant for what happens in the remainder of 2024/25 and into 2025/26.
- 16. In the chart below, despite a considerable gilt market rally in mid-September, rates started and finished the six-month period under review in broadly the same position.

PWL B RATES 02.04.24 - 30.09.24

PWLB Certainty Rate Variations 2.4.24 to 30.9.24

Source: Link Asset Services

ANNUAL INVESTMENT STRATEGY

1. The Council holds significant invested funds, representing income received in advance of expenditure, balances and reserves. During the first half of the current year, the Council’s average investment balance has been around £150m. Investments are made with reference to the core balance, future cash flow requirements and the outlook for interest rates.
2. The Council’s investment policy has regard to the DLUHC’s Guidance on Local Government Investments (“the Investment Guidance”) and the CIPFA Treasury Management in Public Services Code of Practice and Cross Sectoral Guidance Notes (“the CIPFA TM Code”). The Council’s investment priorities will be security first, liquidity second, then return.
3. In accordance with the above guidance and to minimise the risk to investments, the Council applies minimum acceptable credit criteria to generate a list of highly creditworthy counterparties, which will provide security of investments, enable diversification and minimise risk. The key ratings used to monitor counterparties are the short-term and long-term ratings.

Investment return expectations

4. The current forecast shown in paragraph 5 includes a forecast for Bank Rate to fall to a low of 3.5%.
5. The suggested budgeted investment earnings rates for returns on investments placed for periods up to about three months during each financial year are as follows (the long-term forecast is for periods over ten years in the future):

Average earnings in each year	Now	Previously
2024/25 (residual)	4.60%	4.25%
2025/26	4.10%	3.35%
2026/27	3.70%	3.10%
2027/28	3.50%	3.25%
2028/29	3.50%	3.25%
Years 6 to 10	3.50%	3.25%
Years 10+	3.50%	3.50%

Source: Link Asset Services

Investment time limits

6. This limit is set with regard to the Council's liquidity requirements and to reduce the need for early sale of an investment. For the year 2025/26, the proposed limit of investments for over 364 days is £120m, as set out in the TMSS.

Investment Policy

7. The Council's officers recognise that ratings should not be the sole determinant of the quality of an institution and that it is important to assess continually and monitor the financial sector on both a micro and macro basis and in relation to the economic and political environments in which institutions operate. The assessment will also take account of information that reflects the opinion of the markets. To this end the Council will engage with its advisors to maintain a monitor on market pricing such as "credit default swaps" and overlay that information on top of the credit ratings.
8. Other information sources used will include the financial press, share price and other such information pertaining to the banking sector to establish the most robust scrutiny process on the suitability of potential investment counterparties.

Creditworthiness Policy

9. The primary principle governing the Council's investment criteria is the security of its investments, although the yield or return on the investment is also a key consideration. After this main principle, the Council will ensure that:
 - It maintains a policy covering both the categories of investment types it will invest in, criteria for choosing investment counterparties with adequate security and monitoring their security; and
 - It has sufficient liquidity in its investments. For this purpose, it will set out procedures for determining the maximum periods for which funds may prudently be committed. These procedures also apply to the Council's prudential indicators covering the maximum principal sums invested.
10. The Director of Finance will maintain a counterparty list in compliance with the following criteria and will revise the criteria and submit them to Council for approval as necessary. These criteria are separate to those which determine which types of investment instrument are either specified or non-specified as they provide an overall pool of counterparties considered high quality which the Council may use, rather than defining what types of investment instruments are to be used.
11. The Council takes into account the following relevant matters when proposing counterparties:
 - the financial position and jurisdiction of the institution;
 - the market pricing of credit default swaps¹ for the institution;

¹ Credit Default Swaps (CDS) are tradable instruments where the buyer receives a pay-out from the seller if the party to whom the CDS refers (often a financial institution) has a "credit event" (e.g. default, bankruptcy, etc.). The price of the CDS gives an indication to the market's view of likelihood: the higher the price the more likely the credit event.

- any implicit or explicit Government support for the institution;
 - Standard & Poor, Moody's and Fitch short- and long-term credit ratings;
 - Sovereign ratings to select counterparties from only the most creditworthy countries; and
 - Core Tier 1 capital ratios ².
12. Changes to the credit rating will be monitored and, in the event that a counterparty is downgraded and does not meet the minimum criteria specified, the following action will be taken immediately:
- no new investments will be made;
 - existing investments will be recalled if there are no penalties; and
 - full consideration will be given to recall or sell existing investments which would be liable to penalty clause.

Specified and Non-specified investments

13. The MHCLG Guidance on Local Government Investments made under section 15(1) of the Local Government Act 2003, places restrictions on local authorities around the use of specified and non-specified investments. A specified investment is defined as an investment which satisfies all of the conditions below:
- The investment and any associated cash flows are denominated in Sterling;
 - The investment has a maximum maturity of one year;
 - The investment is not defined as capital expenditure; and
 - The investment is made with a body or in an investment scheme of high credit quality; or with the UK Government, a UK Local Authority or parish/community council.
14. Investments with UK local authorities are deemed to be high credit quality because of the strong regulatory financial framework within which local authorities are required to operate and which mitigates against the risk of default, summarised below:
- The requirement to set a balanced budget annually under sections 31A and 42A of the Local Government Finance Act 1992;
 - The requirement to budget for a minimum level of reserves including risk under the Local Government Act 2003;

² The Tier 1 capital ratio is the ratio of a bank's core equity capital to its total risk-weighted assets (RWA). Risk-weighted assets are the total of all assets held by the bank weighted by credit risk according to a formula determined by the Regulator (usually the country's central bank). Most central Banks follow the Basel Committee on Banking Supervision (BCBS) guidelines in setting formulae for asset risk weights.

The Core Tier 1 ratios for the four UK banks that the Council uses are: Barclays: 10.2%, HSBC: 11.2%, Lloyds: 12.0% and RBS: 10.8%.

- The requirement for the S151 officer to issue a statutory report in the event that the authority intends to not set an adequate level of reserves or intends to undertake a course of action which he considers to be unlawful;
 - The requirement for long-term borrowing to be solely for capital expenditure;
 - The cap on excessive borrowing through the operation of the limits in the Prudential Code;
 - All borrowing has to be secured on revenues of a local authority rather than assets.
15. All investments with local authorities will be subject to due diligence review of their accounts and financial health by the Director of Treasury and Pensions.
16. A non-specified investment is any investment that does not meet all the conditions above. In addition to the long-term investments listed in the table below, the following non-specified investments that the Council may make include:
- **Green Energy Bonds:** Investments in solar farms are a form of Green Energy Bonds that provide a secure enhanced yield. The investments are structured as unrated bonds and secured on the assets and contracts of solar and wind farms. Before proceeding with any such investment, internal and external due diligence will be undertaken in advance of investments covering the financial, planning and legal aspects.
 - **Loans:** The Council may consider advancing loans (as a form of investment) to organisations delivering services for the Council where this will lead to the enhancement of services to Council stakeholders. The Council will undertake due diligence checks to confirm the borrower's creditworthiness before any sums are advanced and will obtain appropriate levels of security or third party guarantees for loans advanced. The Council would expect a return commensurate with the type and duration of the loan. All loans would need to be in line with the Council's Scheme of Delegation and Key Decision thresholds levels.
 - **Shareholdings in limited companies and joint ventures:** The Council may invest in three forms of company:
 - Small scale businesses aimed at promoting economic growth in the area. Individual investments are no more than £0.5m and the aim is for these to be self-financing over the medium term. Any such loans will be subject to due diligence and the Council's Scheme of Delegation and Key Decision thresholds levels.
 - Trading vehicles which the Council has set up to undertake particular functions. Currently the Council has interests in the following companies: Lyric Theatre Hammersmith Ltd, Hammersmith and Fulham Urban Studies Centre, Hammersmith and Fulham Bridge Partnership, HFS Developments LLP, HFS Developments 2 LLP, LBHF Ventures Ltd, LBHF Joint Ventures Ltd and LBHF Family Support Services Ltd. These are not held primarily as investments but to fulfil Council service objectives. Any new proposals will be subject to due diligence as part of the initial business case. As these are

not to be held primarily as investment vehicles, then there is an expectation that they will break even.

- Trading vehicles held for a commercial purpose where the Council is obliged to undertake transactions via a company vehicle. These will be wholly owned subsidiaries of the Council with the aim of diversifying the investment portfolio risk.

17. For any such investments, specific proposals will be considered by the Director of Treasury and Pensions, and the Director of Finance in consultation with the Cabinet Member for Finance and Commercial Services and approvals to be in accordance with the Council's Constitution and governance processes, after taking into account:

- cash flow requirements
- investment period
- expected return
- the general outlook for short to medium term interest rates
- creditworthiness of the proposed investment counterparty
- other investment risks
- due diligence review

The value of non-specified investments will not exceed their investment allocation.

Country of Domicile

18. The current TMSS allows deposits / investments with financial entities domiciled in the countries listed at the foot of the schedule of investments table.

Schedule of investments

19. The current criteria for providing a pool of high quality short, medium and long-term, cash-based investment counterparties along with the time and monetary limits for institutions on the Council's counterparty list are in the table below.

20. The counterparties and specific limits have been reviewed and updated.

All investments listed below must be Sterling denominated

Investments	Minimum Credit Rating Required (Fitch/Moody's/S&P)	Maximum Individual Counterparty Investment Limit £m	Maximum tenure	Changes from the 2024/25 TMSS
DMO Deposits	Government Backed	Unlimited	6 months	No change
UK Government (Gilts/T-Bills/Repos)	Government Backed	Unlimited	Unlimited	No change
Supra-national Banks, European Agencies	LT: AA-/Aa3/AA-	£50m	5 years	No change
Covered Bonds	LT: AA+/Aa1/AA+	£50m	5 years	No change
Network Rail	Government guarantee	£200m maximum	Oct-52	No change
Collective Investment Scheme Investment Grade Bond Fund	Due diligence	£30m	Daily pricing	No change
GLA		GLA: £50M	3 years	No change
UK Local Authorities (LA)	N/A	LA: £30m per LA, per criteria £200m in aggregate	3 years	No change
Commercial Paper issued by UK and European Corporates	LT: AA-/Aa3/AA- ST: F1+/P-1/A-1+	£20m per name £80m in aggregate	1 year	No change
Money Market Funds (MMF)	LT: AAA by at least one of the main credit agencies	£45m per Fund Manager £300m in aggregate	3-day notice	No change
Enhanced Money Funds (EMF)	LT: AAA by at least one of the main credit agencies	£25m per fund manager, £100m in aggregate	Up to 7 day notice	No change

Investments	Minimum Credit Rating Required	Maximum Individual Counterparty Investment Limit	Maximum tenure	Changes from the 2024/25 TMSS
	Fitch/Moody's/S&P	£m		
UK Bank (Deposit/Certificates of Deposit/Short Dated Bonds)	LT: AA-/Aa3/AA- or UK Government Ownership greater than 25%	£70m	3-5 years	No change
	LT: A-/A3/A-	£50m	1-3 years	No change
	ST: F2/P-2/A-2	£50m	0-1 year	No change
Non-UK Bank (Deposit/Certificates of Deposit/Short Dated Bonds)	LT: AA-/Aa2/AA-	£50m	1-3 years	No change
	ST: F2/P-2/A-2	£30m	0-1 year	No change
Green Energy Bonds	Internal and External due diligence	Less than 25% of the total project investment or maximum of £20m per bond.	10 years	No change
		£50m in aggregate		
Rated UK Building Societies	LT: A3/A-	£30m	3 years	No change
	ST: F2/P-2/A-2			
Sovereign approved list (AA- rated and above):	Australia, Belgium, Canada, Denmark, Finland, France, Germany, Netherlands, Norway, Singapore, Sweden, Switzerland, UK and USA			

UK T-Bills: UK Government Treasury Bills (T-Bills) are short term promissory notes issued by the UK Government at a discount to par, for tenors of up to one year.

UK Gilts: UK Government Gilts provide a greater yield than cash deposits with the DMO.

UK Government repurchase agreements (Repos): UK Government repurchase agreements are the purchase of UK Government securities with an agreement to resell them back at a higher price at a specific future date.

Commercial Paper (CP) is similar to a very short-term bond issue (up to one year), issued to investors on a discounted basis, and with the interest rate based on prevailing rates at the time of pricing.

Supra-national institutions are those that sovereign backed or supported institutions that span more than one country, such as the European Investment Bank, the European Bank of Reconstruction and Development, the World Bank, etc.

Network Rail: All Network Rail infrastructure debt is directly and explicitly backed by a financial indemnity from the Secretary of State for Transport acting for and on behalf of the government of the United Kingdom of Great Britain. The financial indemnity is a direct UK sovereign obligation of the crown and cannot be cancelled for any reason (prior to its termination date in October 2052). Propose to change TMSS limit to £200m and set the maximum maturity to Oct 2052.

Due diligence: Due diligence will be carried out by officers where appropriate or in conjunction with the Council's treasury advisor. The Tri-Borough Director of Treasury and Pensions will authorise the investment on behalf of the authority.

APPENDIX G

Risk Group	Risk Ref.	Risk Description	Impact			Likelihood	Current risk score	Mitigation actions
			Financial	Reputation	Total			
Financial	1	Interest Rate Risk: the risk that rises in interest rates create an unexpected burden on the organisation's finances, against which the organisation has failed to protect itself adequately.	2	1	3	4	12	The Council will continue to invest and borrow in accordance with the TMSS. Borrowing conversations will be set by "trigger points", enacted when gilt yields reach a certain long term levels, where discussions with the Council's S151 officer, T&P Director and the Cabinet Member will take place to discuss potential actions.
Financial	2	Prudent Investment Strategy: the overall treasury management strategy is too prudent and unnecessarily stringent, resulting in investment returns being lower than might have been achieved with a more risky, but ultimately safe, approach.	3	2	5	2	10	The TMSS, outturn reports and mid-year reports are scrutinised on a regular basis by the Audit Committee with actions minuted and implemented.
Financial	3	Credit and counterparty risk: the risk of failure by a counterparty to meet its contractual investment or borrowing obligations to the organisation, particularly as a result of the counterparty's diminished creditworthiness, and the resulting detrimental effect on the organisation's capital or	3	4	7	1	7	As part of the TMSS, counterparty criteria have been set at a level to allow only the most financially secure banks and counterparties a place within the lending list, which is regularly monitored against consultant updates and advice provided by the Council's Treasury advisor.
Financial	4	Geopolitical factors: the risk of investment market uncertainty and investor panic, leading to unexpected volatility in gilt yields and interest rates.	2	3	5	3	15	Recent forecasts from the Council's Treasury consultant predict that the Bank Rate will gradually reduce over the coming months resulting in return on investing declining. However, the cost of borrowing will also decrease, helping to minimise the cost of carry.
Financial	5	Liquidity Risk: the risk that cash will not be available when it is needed, leading to additional costs, with the organisation's business/service objectives ultimately compromised.	4	2	6	1	6	Around half of the councils funds are kept fully liquid in Money Market Funds, which offer same day accessibility for both deposits and withdrawals. The remainder of the funds are placed as fixed-term deposits for upto 1 year.
Operational	6	Fraud, error and corruption: the risk that an organisation fails to identify the circumstances in which it may be exposed to loss through fraud, error, corruption or other eventualities in its treasury management dealings, and fails to employ suitable systems and internal controls to maintain effective management arrangements to these ends.	3	4	7	1	7	Internal controls within the treasury function are extremely robust in terms of internal check, accounting, authorisation and segregation of duties. Treasury is currently awaiting the results of an internal audit that took place in October 2024.
Operational	7	Financial failure of the Council's main bank: the collapse of the council's main banker, leading to a total shutdown of services.	4	4	8	1	8	The suitability of NatWest is assessed regularly along with other institutions. It is regarded as highly unlikely that the UK Government would permit a clearing bank to fail.
Operational	8	Online banking platform failure: the partial or complete failure of the Council's online banking system, resulting in termination of online payments and provision of banking data.	2	4	6	1	6	NatWest is regarded as having considerable resilience, both in preventing such failures and having recovery programmes in place if such an event happened. In the event that payments cannot be made online, the Council can make a manual payment by faxing a payment request to the CHAPS team at NatWest.

RISK REGISTER

Appendix 1 - Risk Management Scoring Matrix		
Scoring (Impact)		
Impact Description	Category	Description
1 Very Low	Cost/Budgetary Impact	£0 to £25,000
	Impact on life	Temporary disability or slight injury or illness less than 4 weeks (internal) or affecting 0-10 people (external)
	Environment	Minor short term damage to local area of work.
	Reputation	Decrease in perception of service internally only – no local media attention
	Service Delivery	Failure to meet individual operational target – Integrity of data is corrupt no significant effect
2 Low	Cost/Budgetary Impact	£25,001 to £100,000
	Impact on life	Temporary disability or slight injury or illness greater than 4 weeks recovery (internal) or greater than 10 people (external)
	Environment	Damage contained to immediate area of operation, road, area of park single building, short term harm to the immediate ecology or community
	Reputation	Localised decrease in perception within service area – limited local media attention, short term recovery
	Service Delivery	Failure to meet a series of operational targets – adverse local appraisals – Integrity of data is corrupt, negligible effect on indicator
3 Medium	Cost/Budgetary Impact	£100,001 to £400,000
	Impact on life	Permanent disability or injury or illness
	Environment	Damage contained to Ward or area inside the borough with medium term effect to immediate ecology or community
	Reputation	Decrease in perception of public standing at Local Level – media attention highlights failure and is front page news, short to medium term recovery
	Service Delivery	Failure to meet a critical target – impact on an individual performance indicator – adverse internal audit report prompting timed improvement/action plan - Integrity of data is corrupt, data falsely inflates or reduces outturn of indicator
4 High	Cost/Budgetary Impact	£400,001 to £800,000
	Impact on life	Individual Fatality
	Environment	Borough wide damage with medium or long term effect to local ecology or community
	Reputation	Decrease in perception of public standing at Regional level – regional media coverage, medium term recovery
	Service Delivery	Failure to meet a series of critical targets – impact on a number of performance indicators – adverse external audit report prompting immediate action - Integrity of data is corrupt, data falsely inflates or reduces outturn on a range of indicators
5 Very High	Cost/Budgetary Impact	£800,001 and over
	Impact on life	Mass Fatalities
	Environment	Major harm with long term effect to regional ecology or community
	Reputation	Decrease in perception of public standing nationally and at Central Government – national media coverage, long term recovery
	Service Delivery	Failure to meet a majority of local and national performance indicators – possibility of intervention/special measures – Integrity of data is corrupt over a long period, data falsely inflates or reduces outturn on a range of indicators

Scoring (Likelihood)	
Descriptor	Likelihood Guide
1. Improbable, extremely unlikely	Virtually impossible to occur 0 to 5% chance of occurrence.
2. Remote possibility	Very unlikely to occur 6 to 20% chance of occurrence
3. Occasional	Likely to occur 21 to 50% chance of occurrence
4. Probable	More likely to occur than not 51% to 80% chance of occurrence
5. Likely	Almost certain to occur 81% to 100% chance of occurrence

Control	Details required
Terminate	Stop what is being done.
Treat	Reduce the likelihood of the risk occurring.
Take	Circumstances that offer positive opportunities
Transfer	Pass to another service best placed to deal with mitigations but ownership of the risk still lies with the original service.
Tolerate	Do nothing because the cost outweighs the benefits and/or an element of the risk is outside our control.
