
SPECIAL MOTION NO. 1 – LONDON AIRPORTS

Standing in the names of:

- (i) Councillor Nicholas Botterill
- (ii) Councillor Victoria Brocklebank-Fowler

“1. This Council notes that:

- A two and a half runway airport solution at Heathrow Airport can never provide the successful air transport hub which London needs;
- Additional runway capacity at Heathrow would mean an unacceptable increase in aircraft noise for parts of Hammersmith and Fulham which have to date been less adversely affected, and that;
- The recent operational freedom trials at Heathrow have proved to be highly damaging to borough residents who presently get some respite through runway alteration.

2. This Council utterly rejects any revised plans to build an additional short runway at Heathrow Airport.

3. This Council supports the Mayor of London in his bid to secure a new four runway airport to the east of London as the only practicable economic and environmental solution to London’s requirement for a truly resilient international airport hub.”
