EXECUTIVE SUMMARY

- 1. A total of 750 telephone interviews were conducted among a random sample of London Borough of Hammersmith & Fulham Tenants (611 interviews) and Leaseholders (139 interviews);
- 2. Interviewing took place between 14 August and 4 September 2015;
- 3. Nearly two thirds of respondents (65%) have lived at their current address for more than 10 years, the older the respondent the longer they have lived at their current address;
- 4. 62% of respondents live in a flat in a medium rise block (i.e. 5 or less storeys), 20% of the sample live in a house or bungalow and 16% of respondents live in a flat in a high rise block (in excess of 5 storeys), just 2% of those interviewed live in a maisonette;
- 5. Almost two thirds of the sample (65%) stated that their property was part of an estate whereas 29% stated that they lived in a street. 6% of the sample reside in a sheltered housing scheme;
- 6. Typically respondents live in a property with an average of 2.02 bedrooms but this ranges from bedsits (1%), one bedroom properties (33%), two bedroom properties (38%), three bedroom properties (23%), four bedroom properties (5%), and homes with more than four bedrooms (1%);
- 7. 80% of respondents are happy with where they live (48% very satisfied and 33% satisfied). 6% are dissatisfied and 4% are very dissatisfied;
- 8. A range of reasons were given for what respondents like most about their home. 12% mentioned its good location, 11% cited that they live in a nice area / estate, 11% mentioned that they live in a quiet area / estate, 11% said that it was central / close to amenities and 11% simply said they like everything;
- 9. As for what the sample dislike the most, more than half (51%) said there was nothing they disliked. 6% felt they lived in a noisy place, 5% mentioned that they lived in a dirty area / estate and 5% felt that their home was too small;
- 10. Satisfaction with the quality (physical condition) of their home was high with 33% of respondents stating they were very satisfied and 35% satisfied. 11% were dissatisfied and 6% were very dissatisfied;
- 11. Looking into this in more detail, what respondents like most about the quality of their home were polarised with the top two answers being 'everything' (28%) and 'nothing' (16%), otherwise 12% mentioned that their property was just the right size, 8% felt it was well decorated and 8% liked the good design;
- 12. Nearly half the sample (49%) could not give any aspects they disliked the most about the quality of their home. 6% felt that their windows needed updating, 5% stated that their property was poorly maintained and 5% complained about damp / mould;
- 13. More than 4 out of 10 respondents were unable to offer any suggested improvements to the quality of their home. 8% would like to see double glazing / new windows, 5% suggested that damp proofing measures be applied and 4% would like to see better overall maintenance and repairs;
- 14. Satisfaction with the quality of shared spaces in the area / estate was not as high as some other criteria but nevertheless was still in positive territory with 27% of respondents being very satisfied and 31% satisfied but 12% were dissatisfied and 7% were very dissatisfied;
- 15. Although 31% of sample said 'nothing' when asked what they like most about the quality of the shared spaces, 15% said that they were clean and 14% liked everything, 8% stated that it was a nice / attractive area:
- 16. In contrast, reasons given for disliking the quality of shared spaces were untidy / dirty (15%) and parking is poor (6%) but encouragingly the most popular answer was 'nothing' which was mentioned by 31% of the sample;

- 17. Suggested improvements to the shared spaces were limited with the most common response being 'nothing' (45%) followed by cleaning of the communal areas (17%), provide more parking for residents and guests (8%) and better security / CCTV (6%);
- 18. With regard to respondents' satisfaction with the quality of the housing service provided by the Council, more than a quarter of respondents (26%) are very satisfied and 33% said they were satisfied. 11% were dissatisfied and 10% were very dissatisfied;
- 19. Exploring what respondents liked most about the quality of the housing service showed that 12% of the sample liked the helpful staff, 10% liked the quick response times and 8% felt the housing service was responsive. 46% mentioned either nothing (31%) or don't know (14%);
- 20. More than half the sample (57%) were unable to give any reasons for disliking the quality of the Council's housing service. However 11% were critical with regard to the delays in repairs, 10% felt that the housing service doesn't do its job properly and 7% stated that it was not quick at responding;
- 21. Aligned to the aspects attracting dissatisfaction, suggested improvements to the housing service were faster response times (14%), do a better job / provide a better service (6%) and better communication with tenants (4%). 55% of respondents did not offer any ideas on improving the housing service;
- 22. Almost a third of respondents (32%) were aware of the Residents' Commission on Council Housing, increasing to 37% among males and 37% among those aged 61-70. Awareness was lowest among 18-25 year olds and 26-30 year olds (each recording 19%). 85% of the 512 respondents who were not aware of the Residents' Commission on Council Housing asked for a brief explanation;
- 23. Even among those aware of the Residents' Commission on Council Housing, the majority (60%) did not know its aims and purpose. 10% of the sample thought that it allows tenants to voice concerns, 7% believed it was designed to improve the area and 6% thought it was designed to give tenants control over their area;
- 24. More than three quarters of the interviewees (79%) felt that it was important to be able to have more control or influence over the future of their housing and the services they receive. Only 9% of the sample thought it was either not very important or not at all important;

- 25. There was a net positive interest in four out of the six aspects that respondents were asked if they would like to get involved in. Being on the board and taking part in focus groups attracted a net negative score, nevertheless 30% and 39% of the sample respectively still expressed an interest in these two activities;
- 26. Four out of ten respondents felt that the area or estate where they live could be improved by modernisation or redevelopment, a sentiment that was highest among the younger age groups;
- 27. The principal aspects suggested were updating all the housing to the same standard (15%), refurbish the exterior of the buildings (9%), new windows (8%), make the area look more appealing (7%) and better security / CCTV (7%);
- 28. Approximately six out of ten respondents (58%) would have no concerns with a modernisation or redevelopment programme, however 7% queried if they would have to relocate, 4% were concerned that the area would lose its character and 3% of respondents queried whether it would cost them anything;
- 29. Nearly half of interviewees (47%) felt that the area or estate where they live could be improved by redesigning some of the existing space around the housing, this was a popular idea among all apart from those aged 71+;
- 30. The most popular suggestion was more parking (36%) followed by more green areas (33%) and more play areas for children (22%);
- 31. 74% of the relevant sample didn't mention any concerns they may have in connection with re-designing some of the existing space around the housing and any concerns were limited with no single aspect being mentioned by more than 4% of the sample;
- 32. A third of respondents (35%) thought that there could be a need to build new homes in the area or estate where they live with no appreciable differences between gender and age;
- 33. Among this sub sample 28% would like to see more flats, 19% suggested more family homes, 15% wanted to see social housing and 15% would like to see affordable homes being built;
- 34. When the total sample were asked what impact (if any) they thought the building of any new homes might create, 29% of the sample felt that there was no space for new housing, linked with the 10% who thought it would result in overcrowding. 10% of respondents were of the opinion that new housing would be a good thing and 7% felt that more affordable housing is needed;
- 35. As to whether there is a need for projects or activities that would create local job opportunities, opinion was evenly divided with 48% stating there was a need compared to 53% stating there was no need, a sentiment highest among those aged 71+ (67%);
- 36. Among the 356 respondents who felt there was a need, 19% suggested youth clubs, 7% thought that more should be aimed at children and 6% suggested a community gym / leisure centre;

37. Local newspaper was the most popular source for finding out about local news or something that migaffect where interviewees live with 40% of the sample citing this source. The internet was mentioned 21% of the sample followed by Council Newsletter (14%) and the radio / TV / national newspaper (14%).	d by
