**1. EXECUTIVE SUMMARY**

- 1.1 This report provides an introduction to the Whole Systems Integrated Care (WSIC) Dashboards Programme, implementation across North West London (NWL) and information on future plans and developments.

**2. RECOMMENDATIONS**

- 2.1 It is recommended that the Board note the benefits of the WSIC Dashboards to support system wide integration and proactive case funding and management of patients.

### **3. REASONS FOR DECISION**

- 3.1 Health and Wellbeing Boards have a duty to promote greater integration and partnership between bodies from the NHS, public health and local government. Information sharing between the NHS and local government is a key enabler of more integrated and people-centred health and care services.

### **4. INTRODUCTION AND BACKGROUND**

- 4.1. The WSIC Dashboards provide care professionals with a patient-level integrated care record and a variety of tools that can be used to support case finding, care planning and case management.
- 4.2. Bringing together all the different parts of the health and social care system will provide improved communication and sharing of relevant information to support patient care.
- 4.3. The WSIC Dashboard is a key enabler for delivery of NWL's Sustainability and Transformation Plan (STP) and primarily the following Delivery Areas: better care for people with Long-Term Conditions (LTCs); better care for older people; and improving health and well-being.

### **5. PROPOSAL AND ISSUES**

- 5.1 This pack provides an introduction to the WSIC Dashboards Programme, implementation across NWL, and information on future plans and development.
